PROFILE

AI-SaaS Engineer and Full-Stack Developer specializing in the intersection of artificial intelligence, cybersecurity, machine learning, and modern web technologies. Experienced in taking products from concept to production, building scalable applications and intelligent systems using FastAPI, React, Next.js, LLMs, and retrieval-augmented generation (RAG) pipelines. Combines strong software engineering fundamentals with hands-on expertise in authentication, payment integrations, database migrations, webhooks, CI/CD, quality assurance, and deployment, with a focus on building secure, reliable, and production-ready systems.

EXPERIENCE

AI-SaaS Engineer, Team Lead — **Maktech**, Dhaka *Jan 2026 – Present*

- ~ Lead the AI-SaaS engineering team, owning architecture and delivery across client and internal products.
- ~ Ship full-stack products end to end: FastAPI + PostgreSQL backends, React/Vite front ends, Stripe payments, containerised deployment.
- ~ Build LLM and retrieval-augmented systems over client data using pgvector, ChromaDB, and Pinecone.
- ~ Set team standards — API documentation, code review, deployment health checks, incident triage.

Intern, AI-SaaS Team — **Maktech**, Dhaka *Nov 2025 – Dec 2025*

- ~ Shipped production features on live client products; promoted to team lead within two months.

Quality Assurance Intern — **Summit Towers Limited**, Dhaka *Aug 2025 – Oct 2025*

- ~ Quality & Service Assurance: snag analysis, data backup, ad-hoc project management; supported telecom engineering and vendor management.

SELECTED PROJECTS

Trubbi — Group Trip Planning Platform trubbi.ai
Group travel planning product removing the coordination overhead of planning trips; shipped through launch and waitlist onboarding. *React · FastAPI · PostgreSQL*

Addvanced AI — Deal Hunter addvancedai.com
AI deal-discovery platform surfacing and ranking offers automatically, replacing manual comparison with a scored feed. *Python · React · LLM*

Elyxa AI elyxaai.com
AI SaaS platform delivered end to end — product surface, API layer, deployment. *React · FastAPI · 6 Agents*

CTHTS — Cyber Threat Hunting & Termination System
ML platform analysing live network traffic to detect and block malicious IPs automatically. **Top-20 of 130+ teams**, NSU Innovation Challenge.
Suricata · Cowrie · T-Pot · NS-3 · PyTorch
